PROGRAM OVERVIEW

The focus of this program is obtaining the physique of **Toji Fushiguro**. This means the focus is entirely on training to build a body like him.

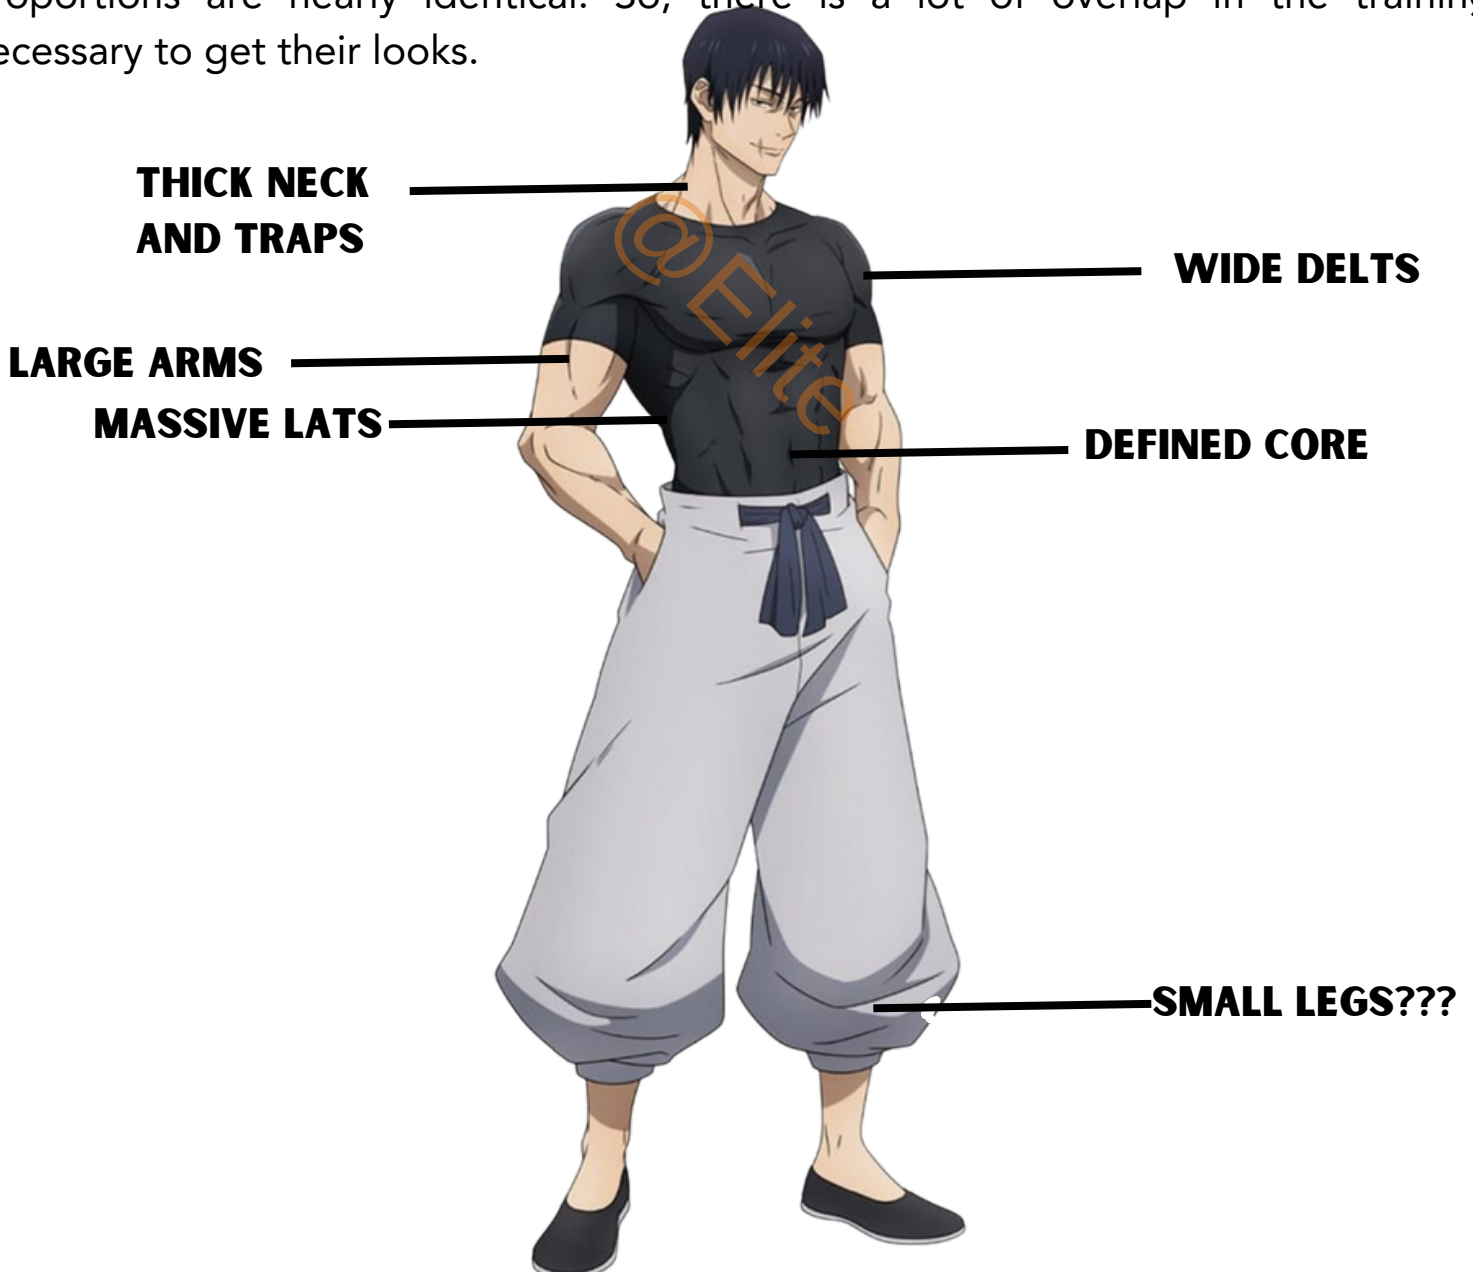

The program will consist purely of the following:

Weightlifting	Strength training using weights to build muscle and improve strength. Increases muscle mass, boost metabolism, and enhance bone density.
Calisthenics	Exercises that uses bodyweight movements and minimal equipment to build strength and flexibility.

Why isn't there much variance in training? For this program, we'll keep things simple. There's no need for boxing drills and such like in the **Batman 2022** and **Baki** Programs.

PROGRAM OVERVIEW

The focus of this program is entirely to achieve a body like Toji. He's muscular overall and can be compared to the likes of professional bodybuilders. Because of this, we should train like bodybuilders to look like him. He has a V-Taper which is what happens when you have a broad upper body with a small waist. So, in total, the muscle groups we have to put an emphasis on training are the neck, traps, delts, lats, and quads. Toji's arms and abs are also a huge strong point so this program is tailored to hit those muscle groups hard as well. However, we don't know how developed Toji's legs are because of the clothes he wears, but we can assume they're above average, so we'll train them at-least 1x a week. You may notice this program is similar to **Spiderman 2099**. This is because Toji and Miguel's proportions are nearly identical. So, there is a lot of overlap in the training necessary to get their looks.

PROGRAM OVERVIEW

For this program, there is 2 different splits that achieve the same goals but by different methods. Both splits have an emphasis on the prominent muscle groups listed above. It is necessary that you choose the split that works best for you based on your preferences and experience. Feel free to switch between the splits between 8 week periods to experiment and see which yields better results for you. Both of these splits will create heavy fatigue, so proper rest and recovery is crucial.

Split A - 3 Day/Week High Intensity Upper/Lower Minimalist.

This split is for those who prefer to train less and to train hard. Inspired by Mike Mentzer, nearly every set in this routine will be trained close or to failure in order to obtain the most stimulus in a short amount of time. If you're new to the gym, and don't know how to push your limits, this one may not be for you. I recommend this split if you know how to train hard and have a busy life (Day to day job, schools, other responsibilities, ect.) that may get in the way of your training. If you do choose to run this split, understand that you **NEED** to be training hard since its only 3 days a week.

Split B - 5 Day/Week High Volume Body Part Split

This split is for those who prefer to train more. Since this split is high volume, training to failure will not be necessary for the majority of the exercises. If you're a beginner, I recommend this split before trying Split A since you may not know your limits yet or have perfected your form to train that hard.

IMPORTANT: Repeat each Split 2x (8 Weeks) Before Taking A Deload Week.

TRAINING TO FAILURE

In this program, there will be exercises that would best be done trained to failure. Because of this, it is crucial you understand what training to failure really means and what it looks like. For Split A, the majority of the exercises will be trained to failure its especially necessary to look through this page if you choose that one. There are two kinds of ways of achieving failure.

1. **Technical Failure (RPE 9/ 1 RIR)** - Doing as many reps as you physically can in a single set while maintaining proper form meaning you cannot perform another rep without cheating on form, cutting ROM, having spotter assistance. Should be used in compound movements such as bench press, pull ups, and squats. Holding the eccentric (lowering phase) for each of these exercises is important to get the most out of each rep. Training these compounds movements to absolute failure is extremely dangerous so fail the sets with proper form (technical failure).

2. **Absolute Failure (RPE 10/ 0 RIR)**- Doing as many reps as you physically can while ignoring the jurisdictions of proper form. Should be used in isolation movements such as lateral raises and bicep curls. Since isolation movements train a single muscle group, there is much less risk of injury of training to absolute failure on these movements than if you were to train to absolute failure in a compound movement.

13 Minute Video Explaining This If You Need It (I'm not affiliated with Revival Fitness in anyway so all credits to him.): <https://www.youtube.com/watch?v=DhHzT5EXAkM>

F.A.Q.

1. What gym equipment do I need?

A: For this program in, all you need is access to barbells, dumbbells, and a pull up bar. Ideally, you'll want to have a **gym membership** which is much cheaper than buying your own equipment. If you're looking to purchase equipment, there is a list of Amazon Affiliate Links of gym equipment you may need on page 38.

2. How do I know if I am progressing?

A: Bodybuilding is a slow process and you have to accept that. It is hard to determine if you're making progress visually from day to day or even week to week. I'd recommend utilizing progress pictures every 1-2 months to see differences. Remember, if you're consistently training hard, eating enough, and getting enough sleep you are **most likely** progressing.

3. How much muscle can I expect to gain?

A: The amount of muscle you put on is determined by your genetics and how hard you work. It can also be determined by if you've weight trained before. If you're new to lifting, you can expect to put on more muscle mass than someone who has been going to the gym for 3 years.

4. Should I cut or bulk?

A: For this specific program and most programs in general, you should be eating in caloric surplus of 200-500 calories. Eating in a caloric surplus will build the most muscle and allow the fastest recovery during rest days.

5. I'm getting sore from my workouts. Should I skip my training?

A: New stresses on the body such as from weightlifting will cause you to be sore. You should be focusing as much as possible on recovery which includes: sleep, stretching, and massaging/foaming sore muscles to minimize soreness as much as possible. You should still train when you're sore, however, if the soreness prevents you from completing exercises as you normally do, then I recommend skipping until the soreness is gone. Muscle soreness is a part of training especially when you start off, so you'll have to get used to working around it.

6. How should I implement this program?

A: This program includes 2 separate 4 week splits that you repeat twice before deloading. You should choose the split that better fits your schedule and that you're more likely to follow through with. (Deloading is when you either take a week off from training or train with much less intensity for a week for the purpose of recovery)

EXERCISES TUTORIALS

Below is a list for every exercise in the training program, as well as a link for tutorial on how to each one if needed. I am not affiliated with any of the channels I link. Refer to these pages when you don't know how to do an exercise.

Exercise	Muscles Worked	Tutorial
Barbell Row	latissimus dorsi, rhomboids, and trapezius, biceps, rear deltoids	https://www.youtube.com/watch?v=FWJR5Ve8bnQ
Bench Press	pectoralis major and minor, anterior deltoids, triceps	https://www.youtube.com/watch?v=4Y2ZdHCOXok
Bicep Curl	biceps brachii	https://www.youtube.com/watch?v=ykJmrZ5v0Oo
Boxing Drills	Full Body	https://www.youtube.com/watch?v=aPtehDspmf0&t=208s
Bulgarian Split Squat	quadriceps, hamstrings, glutes, and stabilizing muscles of the core.	https://www.youtube.com/shorts/lG3MsPmEQQk
Calf Raise	gastrocnemius and soleus	https://www.youtube.com/watch?v=eMTy3qylqnE
Chest Fly	pectoralis major and anterior deltoids	https://www.youtube.com/watch?v=QENKPHhQVi4
Dips	triceps, chest, and shoulders	https://www.youtube.com/watch?v=yN6Q1UI_xkE

Exercise	Muscles Worked	Tutorial
Double Crunch	rectus abdominis and hip flexors	https://www.youtube.com/watch?v=otOKB-iZ548
Face Pull	rear deltoids, rhomboids, rotator cuffs	https://www.youtube.com/watch?v=V8dZ3pyiCBo
Hammer Curl	brachialis, brachioradialis, and biceps	https://www.youtube.com/shorts/cDKOkTT9OnQ
Hanging Leg Raise	rectus abdominis and hip flexors	https://www.youtube.com/watch?v=RuldJSVTKO4
Hamstring Curl	hamstrings	https://www.youtube.com/shorts/ANKSmhT0dTk
Lat Pulldown	latissimus dorsi, biceps, rear deltoids	https://www.youtube.com/watch?v=Z_3xHwuO8Tk
Lateral Raise	lateral deltoids and traps	https://www.youtube.com/shorts/G-piLwLu0d4
Leg Extension	quadriceps	https://www.youtube.com/watch?v=ljO4jkwv8wQ
Neck Curl	neck flexors, sternocleidomastoid, scalene	https://www.youtube.com/watch?v=FPO1wKDQUs8
Neck Extension	splenius and trapezius	https://www.youtube.com/watch?v=FPO1wKDQUs8

Exercise	Muscles Worked	Tutorial
Overhead Press	anterior deltoids, triceps	https://www.youtube.com/watch?v=F3QY5vMz_6I
Overhead Tricep Extension	triceps	https://www.youtube.com/shorts/8FNGBJUHfsA
Pull Ups	latissimus dorsi, biceps	https://www.youtube.com/watch?v=eGo4YlbE5g
Reverse Wrist Curl	forearm extensors	https://www.youtube.com/watch?v=osYPwlBiCRM
Romanian Deadlift	hamstrings, glutes, and lower back muscles	https://www.youtube.com/watch?v=_oyxCn2iSjU
Seal Row	latissimus dorsi, rhomboids, and trapezius, biceps	https://www.youtube.com/watch?v=9ffaage-LjY
Seated Calf Raise	gastrocnemius and soleus	https://www.youtube.com/watch?v=JbyjNymZOt0
Shoulder Shrug	trapezius, neck	https://www.youtube.com/watch?v=cJRVVxmytaM
Squat	quadriceps, hamstrings, glutes, and lower back muscles	https://www.youtube.com/watch?v=gcNh17Ckjgg
Stretching	Full Body	https://www.youtube.com/watch?v=sOuKeVuej9E

Exercise	Muscles Worked	Tutorial
Tricep Push Down	triceps	https://www.youtube.com/watch?v=2-LAMcpzODU
Wrist Curl	forearm flexors	https://www.youtube.com/watch?v=3VLTzlrnb5g
Wide Grip Pull Ups	latissimus dorsi, biceps	https://www.youtube.com/watch?v=bHC16skSN6Q&t=349s
Wide Grip Pulldowns	latissimus dorsi, biceps	https://www.youtube.com/watch?v=5gL2XgHghLY
Zottman Curl	forearm flexors, extensors, biceps	https://www.youtube.com/watch?v=ZrpRBgswtHs
Chin Up	latissimus dorsi, biceps	https://www.youtube.com/watch?v=brhRXIOhsAM
Reverse Grip Pulldown	latissimus dorsi, biceps	https://www.youtube.com/watch?v=apzFTbsm7HU&t=61s
Rear Delt Fly	rear delts (obviously lol)	https://www.youtube.com/watch?v=EA7u4Q_8HQ0
Shrugs	trapezius	https://www.youtube.com/watch?v=cJRVVxmytaM&t=1s
Cable Crunch	rectus abdominus	https://www.youtube.com/watch?v=jBtiDLz0y7s

WARM UP

Before we look at how exactly you should warm up, it's important to understand the **purpose** of warming up. Some reasons to warm up are:

1. **Improved Performance**
2. **Increased Blood Flow**
3. **Enhance Muscle Flexibility**
4. **Injury Prevention**
5. **Reduced Muscle Stiffness**
6. **Mental Preparation**
7. **Post-Workout Recovery**

Clearly, warming up is crucial and skipping it is detrimental to your gains and if you choose to skip warming up, you're only hurting yourself in the long run and are bound to suffer from preventable injuries.

There's a variety of ways to warm up. The easiest and simple way is to do pyramid sets in which you start your exercise with 1-3 light sets. For example, before benching heavy in your working sets, you'd do the following: The Bar (45 LBS/20KG) for 20 reps followed by a plate (135 LBS/61KG) for 10 reps before moving on to your working sets. You can also warm up by using the following routine. You don't have to follow it completely and just use it as a guideline until you feel ready to move on to the full workout.

WARM UP

Exercise	Sets	Reps/Time	Notes
LOW INTENSITY CARDIO	N/A	5-10MIN	Pick any machine such as a treadmill or any form of cardio of your choice to increase your heartrate.
FOAM ROLLING	N/A	2-3MIN	Foam all the large muscle groups such as your lats, quads, hamstrings, and calves.
FRONT/BACK LEG SWING	2	12	12 each leg
SIDE/SIDE LEG SWING	2	12	12 each leg
SHRUGS	2	15	Squeeze traps throughout the movement
HEAD ROTATIONS (CLOCKWISE AND COUNTERCLOCKWISE)	1	1-2MIN	Do the movement slowly and let your neck warm up.

SPLIT A - WEEK 1

DAY 1 Upper Body	SETS	REPS	RPE	Rest	Notes
Wide Grip Pull Ups Or Wide Grip Lat Pulldowns	3	6-12 (FAIL)	9	3-5 MIN	Pull your elbows along your side. Use a shoulder width grip. Engage your entire core throughout the movement. Use a wide grip to bias the lats.
Dumbbell Bench Press	2	8-12 (FAIL)	9	3-5 MIN	Tuck elbows at a 45 degree angle and focus on controlling the weight as you go down and exploding on the upwards part of the rep.
Chin Ups Or Underhand Lat Pulldowns	2	6-12 (FAIL)	9	3-5 MIN	Pull as high up to get the full ROM in order to engage the lats and biceps to the maximum potential.
Rows	3	8-15	8	2-4 MIN	Pull your elbows to your sides. Use dumbbells, a barbell, or cables.
Bicep Curls	3	8-15	8	1-3 MIN	Hold the dumbbell at a supine grip. Maintain a stable posture whilst holding the weight and avoid using momentum. Use weight you can handle.
Tricep Pushdowns	3	FAIL	10	1-3 MIN	Use a full range of motion. Cheat on the last few reps.
Tricep Overhead Extensions	3	FAIL	10	1-3 MIN	Use a full range of motion. Cheat on the last few reps.
Hanging Leg Raises	3	FAIL	10	2-3 MIN	. Avoid excessive swinging and keep your core stable.
Cable Crunches	3	10-20	8	2-3 MIN	Hold rope or bar attachment with both hands behind head. Pull with your upper back and don't keep your back straight.

SPLIT A - WEEK 1

DAY 2 Legs and Shoulders	SETS	REPS	RPE	Rest	Notes
Hamstring Curls	2	8-15	7	1-3 MIN	The purpose of doing these first is to pre-exhaust the hamstrings/warm them up so the quads are biased during the squats.
Squats	2	5-12	8	3-5 MIN	Focus on form over weight to get as much quad activation as possible.
Calf Raises	2	8-20 (FAIL)	9	3-4 MIN	Feel the full stretch of your calves. Don't bounce.
Romanian Deadlifts	2	8-12	8	3-5 MIN	Brace your lats. Keep your chest tall. Keep your back straight throughout the lift and avoid rounding your back. Don't sacrifice form for weight.
Leg Extension	2	FAIL	10	N/A	Use a full range of motion and lower the speed of the lowering phase of the exercise.
Lateral Raises	1-2	FAIL	10	3-5 MIN	Raise dumbbells at an angle to your scapular plane (30-45 degrees). Slightly lean forward.
Rear Delt Flys	1-2	12-30 (FAIL)	10	3-5 MIN	Use a lightweight at a controlled tempo. The rear deltoids are a small muscle that requires perfect form to stimulate fully. Train this hard to get the 3D shoulder look.
Shrugs	3	8-15	7	1-3 MIN	Use correct form and a slow tempo to squeeze out each rep.

SPLIT A - WEEK 1

DAY 3 Accessories + Arms	SETS	REPS	RPE	Rest	Notes
Hanging Leg Raises	4	12-20	8	1-3 MIN	Use a variation that works for you. You can raise knees or legs, or do a laying down position. Avoid excessive swinging and keep your core stable.
Double Crunches	3	12-20	8	1-3 MIN	Pull your knees to your chest
Neck Curls	3	8	7	3-4 MIN	Use very light weight with slow tempo as the neck is a sensitive area and improper form can lead to serious injury
Overhead Tricep Extensions	3	8-12	8	1-3 MIN	Use a full range of motion.
Tricep Pushdowns	3	FAIL	10	2-4 MIN	Use a full range of motion. Cheat on the last few reps.
Deadhangs	2	1 MIN	N/A	1 MIN	Decompresses the spine and builds grip strength.
Stretching	N/A	N/A	N/A	N/A	N/A

SPLIT A - WEEK 2

DAY 1 Upper Body	SETS	REPS	RPE	Rest	Notes
Wide Grip Pull Ups Or Wide Grip Lat Pulldowns	2	6-12 (FAIL)	9	3-5 MIN	Pull your elbows along your side. Use a shoulder width grip. Engage your entire core throughout the movement. Use a wide grip to bias the lats.
Incline Dumbbell Bench Press	2	8-12 (FAIL)	9	3-5 MIN	Tuck elbows at a 45 degree angle and focus on controlling the weight as you go down and exploding on the upwards part of the rep. An incline of 15-30 Degrees is good for the bench.
Chin Ups Or Reverse Grip Lat Pulldowns	2	6-12 (FAIL)	9	3-5 MIN	Pull as high up to get the full ROM in order to engage the lats and biceps to the maximum potential.
Dips	2	8-12 (FAIL)	9	3-5 MIN	Try to keep wrists straight and avoid locking out elbows for unnecessary joint stress. Keep back straight as well.
Rows	2	8-15	8	2-4 MIN	Pull your elbows to your sides. Use dumbbells, a barbell, or cables.
Tricep Pushdown	3	8-15	9	1-3 MIN	Use a full range of motion.
Overhead Tricep Extension	3	8-15	9	1-3 MIN	Use a full range of motion.
Hanging Leg Raises	3	FAIL	10	1-3 MIN	Use a variation that works for you. You can raise knees or legs, or do a laying down position. Avoid excessive swinging and keep your core stable.

SPLIT A - WEEK 2

DAY 2 Legs and Shoulders	SETS	REPS	RPE	Rest	Notes
Hamstring Curls	2	8-15	7	1-3 MIN	The purpose of doing these first is to pre-exhaust the hamstrings/warm them up so the quads are biased during the squats.
Squats	2	5-12	8	3-5 MIN	Focus on form over weight to get as much quad activation as possible.
Calf Raises	2	8-20 (FAIL)	9	3-4 MIN	Feel the full stretch of your calves. Don't bounce.
Romanian Deadlifts	2	8-12	8	3-5 MIN	Brace your lats. Keep your chest tall. Keep your back straight throughout the lift and avoid rounding your back. Don't sacrifice form for weight.
Leg Extension	2	FAIL	10	2-4 MIN	Use a full range of motion and lower the speed of the lowering phase of the exercise.
Lateral Raises	2-3	FAIL	10	3-5 MIN	Raise dumbbells at an angle to your scapular plane (30-45 degrees). Slightly lean forward.
Rear Delt Flys	1-2	12-30 (FAIL)	10	3-5 MIN	Use a lightweight at a controlled tempo. The rear deltoids are a small muscle that requires perfect form to stimulate fully. Train this hard to get the 3D shoulder look.
Shrugs	3	8-15	7	1-3 MIN	Use correct form and a slow tempo to squeeze out each rep.

SPLIT A - WEEK 2

DAY 3 Accessories + Active Recovery	SETS	REPS	RPE	Rest	Notes
Hanging Leg Raises	3	12-20	8	1-3 MIN	Use a variation that works for you. You can raise knees or legs, or do a laying down position. Avoid excessive swinging and keep your core stable.
Double Crunches	3	12-20	8	1-3 MIN	Pull your knees to your chest
Neck Curls	3	8	7	3-4 MIN	Use very light weight with slow tempo as the neck is a sensitive area and improper form can lead to serious injury
Overhead Tricep Extensions	3	8-12	8	3-4 MIN	Use a full range of motion.
Tricep Pushdowns	3	FAIL	10	3-4 MIN	Use a full range of motion. Cheat on the last few reps.
Deadhangs	2	1 MIN	N/A	1 MIN	Decompresses the spine and builds grip strength.

SPLIT A - WEEK 3

DAY 1 Upper Body	SETS	REPS	RPE	Rest	Notes
Wide Grip Pull Ups Or Wide Grip Lat Pulldowns	2	8-12 (FAIL)	9	3-5 MIN	Pull your elbows along your side. Use a shoulder width grip. Engage your entire core throughout the movement. Use a wide grip to bias the lats.
Incline Dumbbell Bench Press	2	8-12 (FAIL)	9	3-5 MIN	Tuck elbows at a 45 degree angle and focus on controlling the weight as you go down and exploding on the upwards part of the rep. An incline of 15-30 Degrees is good for the bench.
Chin Ups Or Reverse Grip Lat Pulldowns	2	8-12 (FAIL)	9	3-5 MIN	Pull as high up to get the full ROM in order to engage the lats and biceps to the maximum potential.
Dips	2	8-12 (FAIL)	9	3-5 MIN	Try to keep wrists straight and avoid locking out elbows for unnecessary joint stress. Keep back straight as well.
Rows	2	8-15	8	2-4 MIN	Pull your elbows to your sides. Use dumbbells, a barbell, or cables.
Bicep Curls	2	8-15 (FAIL)	10	1-3 MIN	Hold the dumbbell at a supine grip. Maintain a stable posture whilst holding the weight and avoid using momentum. Use weight you can handle.
Tricep Pushdowns	3	8-15	8	1-3 MIN	Use a full range of motion.
Hanging Leg Raises	4	FAIL	10	2-4 MIN	Use a variation that works for you. You can raise knees or legs, or do a laying down position. Avoid excessive swinging and keep your core stable.

SPLIT A - WEEK 3

DAY 2 Legs and Shoulders	SETS	REPS	RPE	Rest	Notes
Hamstring Curls	2	8-15	7	1-3 MIN	The purpose of doing these first is to pre-exhaust the hamstrings/warm them up so the quads are biased during the squats.
Squats	2	5-12	8	3-5 MIN	Focus on form over weight to get as much quad activation as possible.
Calf Raises	2	10-20 (FAIL)	9	3-4 MIN	Feel the full stretch of your calves. Don't bounce.
Romanian Deadlifts	2	8-12	8	3-5 MIN	Brace your lats. Keep your chest tall. Keep your back straight throughout the lift and avoid rounding your back. Don't sacrifice form for weight.
Leg Extension	1	FAIL	10	N/A	Use a full range of motion and lower the speed of the lowering phase of the exercise.
Lateral Raises	2-3	FAIL	10	3-5 MIN	Raise dumbbells at an angle to your scapular plane (30-45 degrees). Slightly lean forward.
Rear Delt Flys	1-2	12-30 (FAIL)	10	3-5 MIN	Use a lightweight at a controlled tempo. The rear deltoids are a small muscle that requires perfect form to stimulate fully. Train this hard to get the 3D shoulder look.
Shrugs	3	10-15	7	1-3 MIN	Use correct form and a slow tempo to squeeze out each rep.

SPLIT A - WEEK 3

DAY 3 Accessories + Arms	SETS	REPS	RPE	Rest	Notes
Hanging Leg Raises	3	12-20	8	1-3 MIN	Use a variation that works for you. You can raise knees or legs, or do a laying down position. Avoid excessive swinging and keep your core stable.
Double Crunches	3	12-20	8	1-3 MIN	Pull your knees to your chest
Neck Curls	3	8	7	3-4 MIN	Use very light weight with slow tempo as the neck is a sensitive area and improper form can lead to serious injury
Overhead Tricep Extensions	3	8-12	8	2-4 MIN	Use a full range of motion.
Tricep Pushdowns	3	FAIL	9	3-4 MIN	Use a full range of motion. Cheat on the last few reps.
Deadhangs	2	1 MIN	N/A	1 MIN	Decompresses the spine and builds grip strength.

SPLIT A - WEEK 4

DAY 1 Upper Body	SETS	REPS	RPE	Rest	Notes
Wide Grip Pull Ups Or Wide Grip Lat Pulldowns	2	8-15 (FAIL)	9	3-5 MIN	Pull your elbows along your side. Use a shoulder width grip. Engage your entire core throughout the movement. Use a wide grip to bias the lats.
Dumbbell Bench Press	2	8-15 (FAIL)	9	3-5 MIN	Tuck elbows at a 45 degree angle and focus on controlling the weight as you go down and exploding on the upwards part of the rep.
Chin Ups Or Reverse Grip Lat Pulldowns	2	8-15 (FAIL)	9	3-5 MIN	Pull as high up to get the full ROM in order to engage the lats and biceps to the maximum potential.
Rows	2	8-15	8	2-4 MIN	Pull your elbows to your sides. Use dumbbells, a barbell, or cables.
Bicep Curls	2	8-15 (FAIL)	10	1-3 MIN	Hold the dumbbell at a supine grip. Maintain a stable posture whilst holding the weight and avoid using momentum. Use weight you can handle.
Tricep Pushdowns	2	FAIL	10	1-3 MIN	Use a full range of motion. Cheat on last few reps.
Overhead Tricep Extension	2	FAIL	10	1-3 MIN	Use a full range of motion. Cheat on last few reps.
Cable Crunches	3	10-20	8	1-3	Hold rope or bar attachment with both hands behind head. Pull with your upper back and don't keep your back straight.

SPLIT A - WEEK 4

DAY 2 Legs and Shoulders	SETS	REPS	RPE	Rest	Notes
Hamstring Curls	2	8-15	7	1-3 MIN	The purpose of doing these first is to pre-exhaust the hamstrings/warm them up so the quads are biased during the squats.
Squats	2	5-12	8	3-5 MIN	Focus on form over weight to get as much quad activation as possible.
Calf Raises	2	10-20 (FAIL)	9	3-4 MIN	Feel the full stretch of your calves. Don't bounce.
Romanian Deadlifts	2	8-12	8	3-5 MIN	Brace your lats. Keep your chest tall. Keep your back straight throughout the lift and avoid rounding your back. Don't sacrifice form for weight.
Leg Extension	2	FAIL	10	N/A	Use a full range of motion and lower the speed of the lowering phase of the exercise.
Lateral Raises	2	FAIL	10	3-5 MIN	Raise dumbbells at an angle to your scapular plane (30-45 degrees). Slightly lean forward.
Rear Delt Flys	2	12-30 (FAIL)	10	3-5 MIN	Use a lightweight at a controlled tempo. The rear deltoids are a small muscle that requires perfect form to stimulate fully. Train this hard to get the 3D shoulder look.
Shrugs	3	10-15	7	1-3 MIN	Use correct form and a slow tempo to squeeze out each rep.

SPLIT A - WEEK 4

DAY 3 Accessories + Arms	SETS	REPS	RPE	Rest	Notes
Hanging Leg Raises	4	12-20	9	1-3 MIN	Use a variation that works for you. You can raise knees or legs, or do a laying down position. Avoid excessive swinging and keep your core stable.
Double Crunches	4	12-20	9	1-3 MIN	Pull your knees to your chest
Neck Curls	3	8	7	3-4 MIN	Use very light weight with slow tempo as the neck is a sensitive area and improper form can lead to serious injury
Tricep Overhead Extensions	3	8-12	8	3-4 MIN	Use a full range of motion.
Tricep Pushdowns	3	FAIL	10	3-4 MIN	Use a full range of motion. Cheat on the last few reps.
Deadhangs	2	1 MIN	N/A	1 MIN	Decompresses the spine and builds grip strength.

SPLIT B - WEEK 1

DAY 1 Chest, Triceps, and Shoulders	SETS	REPS	RPE	Rest	Notes
Bench Press	3	6-12	7	2-4 MIN	Tuck elbows at a 45 degree angle and focus on controlling the weight as you go down and exploding on the upwards part of the rep.
Overhead Press	4	8-15	8	2-4 MIN	Keep your core stable and keep your torso upright. Press vertically and you can lean slightly backwards to keep your head clear from the weight.
Chest Flys	3	12	7	1-3 MIN	Squeeze each rep and aim for the full range of motion.
Dips	3	8-12	7	2-4 MIN	Try to keep wrists straight and avoid locking out elbows for unnecessary joint stress. Keep back straight as well.
Lateral Raises	4	8-20	8	1-3 MIN	Raise dumbbells at an angle to your scapular plane. Slightly lean forward.
Tricep Pushdown	3	8-20	7	1-3 MIN	Use a full range of motion.
Rear Delt Fly	4	10-20	8	1-3 MIN	Use a lightweight at a controlled tempo. The rear deltoids are a small muscle that requires perfect form to stimulate fully. Train this hard to get the 3D shoulder look.

SPLIT B - WEEK 1

DAY 2 Legs and Abs	SETS	REPS	RPE	Rest	Notes
Hamstring Curls	2	8-15	7	1-3 MIN	The purpose of doing these first is to pre-exhaust the hamstrings/warm them up so the quads are biased during the squats.
Squats	3	6-8	7	3-5 MIN	Focus on form over weight to get as much quad activation as possible.
Calf Raises	3	10-20	7	1-3 MIN	Feel the full stretch of your calves. Don't bounce.
Romanian Deadlifts	3	8-10	7	3-5 MIN	Brace your lats. Keep your chest tall. Keep your back straight throughout the lift and avoid rounding your back. Don't sacrifice form for weight.
Leg Extension	3	8-12	7	1-3 MIN	Use a full range of motion and lower the speed of the lowering phase of the exercise.
Hanging Leg Raises	4	10-20	7	1-3 MIN	Use a variation that works for you. You can raise knees or legs, or do a laying down position. Avoid excessive swinging and keep your core stable.
Neck Curls	3	8-20	5	1-3 MIN	Use very light weight with slow tempo as the neck is a sensitive area and improper form can lead to serious injury

SPLIT B - WEEK 1

DAY 3 Back and Arms	SETS	REPS	RPE	Rest	Notes
Wide Grip Pull Ups OR Wide Grip Lat Pulldowns	4	8-15	8	2-4 MIN	Pull your elbows along your side. Use a shoulder width grip. Engage your entire core throughout the movement. Use a wide grip to bias the lats.
Row	3	6-8	7	2-4 MIN	Pull your elbows to your sides. Use dumbbells, a barbell, or cables.
Chin Ups or Reverse Grip Lat Pulldowns	4	8-15	8	2-4 MIN	Pull as high up to get the full ROM in order to engage the lats and biceps to the maximum potential.
Face Pull	3	8-10	7	1-3 MIN	Pull your elbows as much as possible along your sides. You should feel your rear delts at the end of the movement.
Dumbbell Curl	3	8-12	7	1-3 MIN	Hold the dumbbell at a supine grip. Maintain a stable posture whilst holding the weight and avoid using momentum. Use weight you can handle.
Single Arm Iliac Pulldown OR LOW ROW	3	8-20	8	1-3 MIN	Two Set Each Arm. Make sure to feel the full stretch of the lats by doing the entire range of motion.
Shrugs	3	8-15	7	1-3	Use correct form and a slow tempo to squeeze out each rep.
Tricep Pushdowns	3	FAIL	10	3-4 MIN	Use a full range of motion. Cheat on the last few reps.

SPLIT B - WEEK 1

DAY 4 Legs and Abs	SETS	REPS	RPE	Rest	Notes
Hamstring Curls	2	8-15	7	1-3 MIN	The purpose of doing these first is to pre-exhaust the hamstrings/warm them up so the quads are biased during the squats.
Squats	3	6-8	7	3-5 MIN	Focus on form over weight to get as much quad activation as possible.
Calf Raises	3	10-20	7	1-3 MIN	Feel the full stretch of your calves. Don't bounce.
Romanian Deadlifts	3	8-10	7	3-5 MIN	Brace your lats. Keep your chest tall. Keep your back straight throughout the lift and avoid rounding your back. Don't sacrifice form for weight.
Leg Extension	3	8-12	7	1-3 MIN	Use a full range of motion and lower the speed of the lowering phase of the exercise.
Hanging Leg Raises	4	10-20	7	1-3 MIN	Use a variation that works for you. You can raise knees or legs, or do a laying down position. Avoid excessive swinging and keep your core stable.
Cable Crunches	3	10-20	8	1-3 MIN	Hold rope or bar attachment with both hands behind head. Pull with your upper back and don't keep your back straight.

SPLIT B - WEEK 1

DAY 5 Back, Biceps, and Shoulders	SETS	REPS	RPE	Rest	Notes
Wide Grip Pull Ups OR Wide Grip Lat Pulldowns	4	8-15	8	2-4 MIN	The purpose of doing these first is to pre-exhaust the hamstrings/warm them up so the quads are biased during the squats.
Row	3	6-8	7	2-4 MIN	Focus on form over weight to get as much quad activation as possible.
Chin Ups or Reverse Grip Lat Pulldowns	4	8-15	8	2-4 MIN	Pull as high up to get the full ROM in order to engage the lats and biceps to the maximum potential.
Dumbbell Curl	3	8-12	7	1-3 MIN	Hold the dumbbell at supine grip. Maintain a stable posture whilst holding the weight and avoid using momentum. Use weight you can handle.
Single Arm Iliac Pulldown	3	8-20	8	1-3 MIN	Two Set Each Arm. Make sure to feel the full stretch of the lats by doing the entire range of motion.
Lateral Raises	4	8-20	8	1-3 MIN	Raise dumbbells at an angle to your scapular plane. Slightly lean forward.
Rear Delt Fly	4	8-20	8	1-3 MIN	Use a lightweight at a controlled tempo. The rear deltoids are a small muscle that requires perfect form to stimulate fully. Train this hard to get the 3D shoulder look.

SPLIT B - WEEK 2

DAY 1 Chest, Triceps, and Shoulders	SETS	REPS	RPE	Rest	Notes
Bench Press	3	6-12	7	2-4 MIN	Tuck elbows at a 45 degree angle and focus on controlling the weight as you go down and exploding on the upwards part of the rep.
Overhead Press	4	8-15	8	2-4 MIN	Keep your core stable and keep your torso upright. Press vertically and you can lean slightly backwards to keep your head clear from the weight.
Chest Flys	3	12	7	1-3 MIN	Squeeze each rep and aim for the full range of motion.
Dips	3	8-12	7	2-4 MIN	Try to keep wrists straight and avoid locking out elbows for unnecessary joint stress. Keep back straight as well.
Lateral Raises	4	10-20	8	1-3 MIN	Raise dumbbells at an angle to your scapular plane. Slightly lean forward.
Tricep Pushdown	3	10-20	7	1-3 MIN	Use a full range of motion.
Rear Delt Fly	4	12-20	8	1-3 MIN	Use a lightweight at a controlled tempo. The rear deltoids are a small muscle that requires perfect form to stimulate fully. Train this hard to get the 3D shoulder look.

SPLIT B - WEEK 2

DAY 2 Legs and Abs	SETS	REPS	RPE	Rest	Notes
Hamstring Curls	2	8-15	7	1-3 MIN	The purpose of doing these first is to pre-exhaust the hamstrings/warm them up so the quads are biased during the squats.
Squats	3	6-8	7	3-5 MIN	Focus on form over weight to get as much quad activation as possible.
Calf Raises	3	12-20	7	1-3 MIN	Feel the full stretch of your calves. Don't bounce.
Romanian Deadlifts	3	8-10	7	3-5 MIN	Brace your lats. Keep your chest tall. Keep your back straight throughout the lift and avoid rounding your back. Don't sacrifice form for weight.
Leg Extension	3	8-12	7	1-3 MIN	Use a full range of motion and lower the speed of the lowering phase of the exercise.
Hanging Leg Raises	4	10-20	7	1-3 MIN	Use a variation that works for you. You can raise knees or legs, or do a laying down position. Avoid excessive swinging and keep your core stable.
Neck Curls	3	8-20	5	1-3 MIN	Use very light weight with slow tempo as the neck is a sensitive area and improper form can lead to serious injury
Cable Crunches	3	10-20	7	1-3 MIN	Hold rope or bar attachment with both hands behind head. Pull with your upper back and don't keep your back straight.

SPLIT B - WEEK 2

DAY 3 Back and Arms	SETS	REPS	RPE	Rest	Notes
Wide Grip Pull Ups OR Wide Grip Lat Pulldowns	4	8-15	8	2-5 MIN	Pull your elbows along your side. Use a shoulder width grip. Engage your entire core throughout the movement. Use a wide grip to bias the lats.
Row	3	6-10	7	2-5 MIN	Pull your elbows to your sides. Use dumbbells, a barbell, or cables.
Chin Ups or Reverse Grip Lat Pulldowns	4	8-15	8	2-5 MIN	Pull as high up to get the full ROM in order to engage the lats and biceps to the maximum potential.
Face Pull	3	8-12	7	1-3 MIN	Pull your elbows as much as possible along your sides. You should feel your rear delts at the end of the movement.

Single Arm Iliac Pulldown	3	12-20	8	1-3 MIN	Two Set Each Arm. Make sure to feel the full stretch of the lats by doing the entire range of motion.
Lateral Raises	4	12-20	8	1-3 MIN	Raise dumbbells at an angle to your scapular plane. Slightly lean forward.
Rear Delt Fly	4	12-20	8	1-3 MIN	Use a lightweight at a controlled tempo. The rear deltoids are a small muscle that requires perfect form to stimulate fully. Train this hard to get the 3D shoulder look.

SPLIT B - WEEK 4

DAY 1 Chest, Triceps, and Shoulders	SETS	REPS	RPE	Rest	Notes
Bench Press	4	6-12	7	2-4 MIN	Tuck elbows at a 45 degree angle and focus on controlling the weight as you go down and exploding on the upwards part of the rep.
Overhead Press	4	8-12	8	2-4 MIN	Keep your core stable and keep your torso upright. Press vertically and you can lean slightly backwards to keep your head clear from the weight.
Chest Flys	4	12	7	1-3 MIN	Squeeze each rep and aim for the full range of motion.
Dips	4	8-15	7	2-4 MIN	Try to keep wrists straight and avoid locking out elbows for unnecessary joint stress. Keep back straight as well.
Lateral Raises	4	10-20	8	1-3 MIN	Raise dumbbells at an angle to your scapular plane. Slightly lean forward.
Overhead Tricep Extension	4	12-20	7	1-3 MIN	Use a full range of motion.
Rear Delt Fly	4	12-20	8	1-3 MIN	Use a lightweight at a controlled tempo. The rear deltoids are a small muscle that requires perfect form to stimulate fully. Train this hard to get the 3D shoulder look.

SPLIT B - WEEK 4

DAY 2 Legs and Abs	SETS	REPS	RPE	Rest	Notes
Hamstring Curls	2	8-15	7	1-3 MIN	The purpose of doing these first is to pre-exhaust the hamstrings/warm them up so the quads are biased during the squats.
Squats	4	6-8	7	3-5 MIN	Focus on form over weight to get as much quad activation as possible.
Calf Raises	4	12-20	7	1-3 MIN	Feel the full stretch of your calves. Don't bounce.
Romanian Deadlifts	4	8-10	7	3-5 MIN	Brace your lats. Keep your chest tall. Keep your back straight throughout the lift and avoid rounding your back. Don't sacrifice form for weight.
Leg Extension	4	8-15	7	1-3 MIN	Use a full range of motion and lower the speed of the lowering phase of the exercise.
Hanging Leg Raises	4	10-20	7	1-3 MIN	Use a variation that works for you. You can raise knees or legs, or do a laying down position. Avoid excessive swinging and keep your core stable.
Neck Curls	3	8-20	5	1-3 MIN	Use very light weight with slow tempo as the neck is a sensitive area and improper form can lead to serious injury

SPLIT B - WEEK 4

DAY 3 Back and Arms	SETS	REPS	RPE	Rest	Notes
Wide Grip Pull Ups OR Wide Grip Lat Pulldowns	4	8-15	8	2-5 MIN	Pull your elbows along your side. Use a shoulder width grip. Engage your entire core throughout the movement. Use a wide grip to bias the lats.
Row	4	6-10	7	2-5 MIN	Pull your elbows to your sides. Use dumbbells, a barbell, or cables.
Chin Ups or Reverse Grip Lat Pulldowns	4	8-15	8	2-5 MIN	Pull as high up to get the full ROM in order to engage the lats and biceps to the maximum potential.
Face Pull	4	8-15	7	1-3 MIN	Pull your elbows as much as possible along your sides. You should feel your rear delts at the end of the movement.
Dumbbell Curl	4	8-12	7	1-3 MIN	Hold the dumbbell at a supine grip. Maintain a stable posture whilst holding the weight and avoid using momentum. Use weight you can handle.
Single Arm Iliac Pulldown OR LOW ROW	4	10-20	8	1-3 MIN	Two Set Each Arm. Make sure to feel the full stretch of the lats by doing the entire range of motion.
Shrugs	3	8-15	7	1-3 MIN	Use correct form and a slow tempo to squeeze out each rep.
Overhead Tricep Extensions	3	8-15	7	1-3 MIN	Use a full range of motion.

SPLIT B - WEEK 4

DAY 4 Legs and Abs	SETS	REPS	RPE	Rest	Notes
Squats	4	6-8	7	3-5 MIN	Focus on form over weight to get as much quad activation as possible.
Calf Raises	4	12-20	7	1-3 MIN	Feel the full stretch of your calves. Don't bounce.
Romanian Deadlifts	4	8-12	7	3-5 MIN	Brace your lats. Keep your chest tall. Keep your back straight throughout the lift and avoid rounding your back. Don't sacrifice form for weight.
Leg Extension	4	8-15	7	1-3 MIN	Use a full range of motion and lower the speed of the lowering phase of the exercise.
Hanging Leg Raises	4	10-20	7	1-3 MIN	Use a variation that works for you. You can raise knees or legs, or do a laying down position. Avoid excessive swinging and keep your core stable.
Double Crunches	4	10-25	8	2-4 MIN	Pull your knees to your chest.

SPLIT B - WEEK 4

DAY 5 Back, Biceps, and Shoulders	SETS	REPS	RPE	Rest	Notes
Wide Grip Pull Ups OR Wide Grip Lat Pulldowns	4	8-15	8	2-4 MIN	The purpose of doing these first is to pre-exhaust the hamstrings/warm them up so the quads are biased during the squats.
Row	4	6-8	7	2-4 MIN	Focus on form over weight to get as much quad activation as possible.
Chin Ups or Reverse Grip Lat Pulldowns	4	8-15	8	2-4 MIN	Pull as high up to get the full ROM in order to engage the lats and biceps to the maximum potential.
Dumbbell Curl	4	8-12	7	1-3 MIN	Hold the dumbbell at supine grip. Maintain a stable posture whilst holding the weight and avoid using momentum. Use weight you can handle.
Single Arm Iliac Pulldown	4	12-20	8	1-3 MIN	Two Set Each Arm. Make sure to feel the full stretch of the lats by doing the entire range of motion.
Lateral Raises	4	12-20	8	1-3 MIN	Raise dumbbells at an angle to your scapular plane. Slightly lean forward.
Rear Delt Fly	4	12-20	8	1-3 MIN	Use a lightweight at a controlled tempo. The rear deltoids are a small muscle that requires perfect form to stimulate fully. Train this hard to get the 3D shoulder look.

EXERCISE SUBSTITUTIONS

Exercise	Substitutions
Barbell Row	Dumbbell Rows, T-Bar Rows, Cable Rows
Bench Press	Dumbbell Bench Press, Incline Bench Press, Push-Ups
Bicep Curl	Hammer Curls, EZ-Bar Curls
Bulgarian Split Squat	Lunges, Step-Ups, Leg Press
Calf Raise	Seated Calf Raises, Donkey Calf Raises, Calf Press on Leg Press Machine
Chest Fly	Pec Deck Machine, Cable Crossovers, Dumbbell Flyes
Chin Ups	Pull-Ups, Assisted Chin-Ups, Lat Pulldowns
Dips	Assisted Dips, Bench Dips, Tricep Push-Ups, Decline Push-Ups
Double Crunch	Russian Twists, Hanging Leg Raises, Planks

Exercise	Substitutions
Face Pull	Rear Delt Flyes, Bent-Over Lateral Raises, Upright Rows
Hammer Curl	Alternating Dumbbell Curls, EZ-Bar Reverse Curls
Hamstring Curls	Romanian Deadlifts, Glute-Ham Raises, Leg Curls on a Machine
Lat Pulldown	Pull-Ups, Chin-Ups, Assisted Pull-Ups
Lateral Raise	Front Raises, Bent-Over Lateral Raises, Cable Lateral Raises
Leg Extension	Leg Press, Squats, Lunges
Neck Curl	Neck Extension, Dumbbell Shrugs, Upright Rows
Neck Extension	Neck Curl, Dumbbell Shrugs, Upright Rows
Overhead Press	Dumbbell Shoulder Press, Push Press, Arnold Press
Overhead Tricep Extension	Tricep Dips, Skull Crushers, Close-Grip Bench Press
Pull Ups	Chin-Ups, Assisted Pull-Ups, Lat Pulldowns
Reverse Wrist Curl	Wrist Curls, Reverse EZ-Bar Curls
Romanian Deadlift	Stiff-Leg Deadlift, Good Mornings, Hyperextensions
Rows	Bent-Over Rows, Seated Rows, T-Bar Rows
Seal Row	Bent-Over Rows, T-Bar Rows, Dumbbell Rows
Seated Calf Raise	Standing Calf Raises, Donkey Calf Raises, Leg Press Calf Raises

Exercise	Substitutions
Shoulder Shrug	Dumbbell Shrugs, Barbell Shrugs, Cable Shrugs
Squat	Front Squats, Hack Squats, Leg Press
Tricep Push Down	Tricep Dips, Skull Crushers, Close-Grip Bench Press
Wrist Curl	Reverse Wrist Curls, Plate Pinches, Farmer's Walks
Wide Grip Pull Ups	Wide Grip Pulldowns
Wide Grip Pulldowns	Wide Grip Pull Ups, Assisted Wide Grip Pull Ups
Zottman Curl	Hammer Curls, Alternating Dumbbell Curls, Reverse Curls
Chin Up	Assisted Chin-Ups, Reverse Grip Pulldowns
Reverse Grip Pulldown	Chin Ups, Assisted Chin-Ups
Rear Delt Fly	Face Pulls, Bent-Over Lateral Raises, Reverse Pec Deck Flyes
Cable Crunches	Leg Raises, Weighted Crunches, Double Crunches, Planks, Russian Twists, V-Ups, Sit-ups

TOOLS YOU MAY NEED

The following products are given via Amazon affiliate links. An Amazon affiliate link is a link given to creators such as myself. If you choose to purchase these products, it will support me as I will earn a percentage of the cost you spent at **NO EXTRA COST** to you. So, if you use any of these affiliate link to buy something, you're really helping me out. Gym equipment is expensive, so ideally you'll want a membership to I've stated earlier. But if you're like me and prefer a home gym I understand and the following pages will make shopping for equipment a lot easier. For the products, I only picked the top sellers with the highest reviews. But again, I highly recommend you invest in a gym membership at first, since it is much cheaper, and will save you a lot more money in the short-term.

THANK YOU!

I try to make these workout programs as valuable as possible so you guys can get closer to your dream physiques. Feel free to contact me via my numerous social medias or on the discord. If you decide to showcase your progress using this program or any other program I create, please @ me or directly tag me, I'd love to shout you out! If you have any additional questions or concerns about anything ask it in any of the channels on the discord and if your question remains unanswered please DM me I'll try to get to you. Ultimately, however, you are responsible for your own progress and the only person that can put in the work is you.
